

## Quadrilaterals Chart

G-QUAD 1

**Instructions:** Complete this quadrilaterals chart by filling in the blanks next to each number. The small arrow symbols on the edges of the quadrilaterals show you pairs of parallel sides.

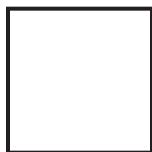

## Classifying Quadrilaterals

G-QUAD 2

**Instructions:** For these quadrilaterals, check each box that applies. There may be multiple right answers because more than one term may apply to each quadrilateral. For example, a square is also technically a parallelogram.

## Finding an Unknown Angle

G-QUAD 3

**Instructions:** For each quadrilateral, find the unknown angle (X). Remember that the four interior angles must add up to a total of 360 degrees.

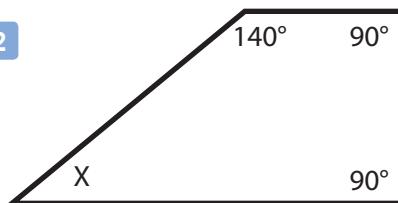

1

$$m\angle X = \underline{\hspace{2cm}} 120^\circ$$

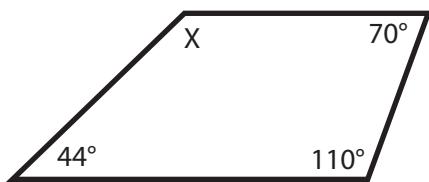

$$\begin{array}{r} 90 \\ 90 \\ + 60 \\ \hline 240 \end{array} \quad \begin{array}{r} 360 \\ - 240 \\ \hline 120 \end{array}$$

## Finding an Unknown Angle in a Parallelogram

G-QUAD 4

**Instructions:** For each parallelogram, find the unknown angle (X). Remember that the opposite angles in a parallelogram are equal, and that all four angles must add to a total of 360 degrees.
